7th International Conference on
Emerging Global Trends in University Library Development
(Library Connect 2018)

Libraries and Its Role in Transforming Societies: Strategies and Trends

Astana, Kazakhstan
23–24 May 2018

webpage: http://nu.kz.libguides.com/library_connect

ABOUT THE CONFERENCE

Libraries are advocates of positive dynamic trends in the society including higher education and public institutions. Tremendous change in libraries had happened for the last decade.

The conference aims to recognize some of the best practices and strategies of libraries in terms of introducing new tools and technologies in the delivery of credible sources and ethical content. It will also identify emerging trends in mobile environments, and understand the value of having diverse management and leadership styles. These changes have helped transform the communities libraries serve in their daily lives. Libraries play a crucial role in information support for learning and research that are considered as driving forces on the development of the society.

It is with great pleasure that we invite local and foreign librarians to participate in this annual conference in Astana. May we all have a fruitful exchange of knowledge and ideas for the development of libraries in Kazakhstan and the whole of Central Asia and beyond.

MESSAGE FROM THE CHAIR

It is a pleasure to welcome you to the Library Connect 2018, in Astana, Kazakhstan. I believe that year by year, Library Connect 2018 is growing to be the major international conference in librarianship in Kazakhstan. This year it is a first time that the conference is organized as a set of tracks in academic and public libraries and under the aegis of the IFLA, with participation of leaders of national libraries from Kazakhstan, Kyrgyzstan, and Uzbekistan, leaders of oblast libraries in Kazakhstan, and Kazakhstani university librarians. As you already know, the main theme of the conference is “LIBRARY CONNECT 2018: Libraries and Its Role in Transforming Societies: Strategies and Trends” and one of its main goals is to promote the UN2030 Agenda to Libraries in Central Asia through awareness-enhancement and capacity-building measures. There is also a round table and seminar program covering various areas. We are honored to have Ms. Ingrid Bon, Manager of the Development Programs Office of the International Federation of Library Associations and Institutions (IFLA) as our keynote speaker.

As organizing chair of this event, I hope that the conference will make an impulse to the libraries’ transformation in our region according to the changes of our society. This will be through a combination of interesting lectures and round tables that will enrich our current knowledge and skills. I hope this annual meeting will provide the perfect forum for both public and academic libraries to interact and discuss future collaborations.

A total of 17 research papers were submitted to the technical program. From these, 8 were selected to be presented as oral presentations during the first day of the conference. I thank all the authors who submitted their papers. I am immensely grateful to the Reviewing Committee for their work and extraordinary efforts. Every member delivered, every review requested, and more. Local authors through open session were also given the chance to share their best practices during the second day of the conference.

Library Connect 2018 was made possible by the hard work of many people. We are especially grateful for the contributions of organization committee with representatives of the Nazarbayev University Library, Eurasian National University Library, National Academic Library of the Republic of Kazakhstan, and Association of Libraries of Higher Educational Institutions of the Republic of Kazakhstan.

Organizational committee and I would like to express our sincere gratitude to the generous and committed sponsors who through their generous support show the high value they place on developing libraries and encouraging their contribution in transforming societies.

We hope that you will find this event enjoyable and valuable. And we hope it embolden and motivate all of us to collaborate more and create the new library community.

ASsemgul Temirkhanova
Acting Deputy General Director for Library

PROGRAM

23 May 2018 (Day 1: Wednesday)

Venue: Block C2, M1, Orange Hall
Nazarbayev University
64 Turan Avenue, Block C2
53 Kabanbay Batyr Avenue (the opposite entrance)

9:00–10:00

REGISTRATION

Opening of the exhibition of information resources

10:00–10:30

PLENARY SESSION

If You Want To Go Fast: Walk Alone, If You Want To Go Far: Walk Together

Ingrid Bon

IFLA

ingrid.bon@ifla.org

The Agenda 2030 and its Sustainable Development Goals offer big opportunities to libraries and more specific to public libraries. Whether they are aware or not, public libraries are supporting development goals in every country around the world.

This presentation will touch up on the timeline from start, year 2000 Millennium Goals till year 2030 when the Agenda 2030 should be realized. It will show how IFLA was speaking at the UN meeting but also the steps that have been taken into getting libraries on the agenda, showing that libraries are agents and motors to change.

This valuable asset to society knows an infrastructure worldwide, a connected library field, to work for a better world. Worldwide libraries contribute to help people get connected to the internet and access the information they need. Informed people are citizens that can make better decisions and deliver support to an inclusive society.

Priorities of Development and Problems of the University Library of Kazakhstan

Gulzhan Janisbekovna Irzhanova

irzhanova@mail.ru

Cooperative Collection Development and Research Services: Past, Present and Future

George Andrew Spencer

University of Wisconsin-Madison, USA

gaspencer@wisc.edu

The future direction of research libraries clearly lies in increasing cooperation with other research libraries. This paper surveys the history of American cooperative collection programs, such as the Farmington Plan, the Research Libraries Group (RLG) Conspectus, the Library of Congress Cooperative Acquisition Program (LC-CAP), and the activities of the Center for Research Libraries as well as more recent examples such as the resource sharing program within the University of Wisconsin (UW) System, and the UNC-Chapel Hill – Duke University cooperative Africana collection. The paper explores some of the methodologies and technologies used to facilitate cooperative initiatives between libraries at the regional, national and international level. Examples include: OCLC Worldcat; shared regional system library catalogs such as the UW System's Ex Libris Alma based catalog, and shared acquisition systems such as YBP-Gobi used by the UNC-Chapel Hill – Duke University project. The paper also examines potential areas for future collaboration and cooperation, for example in cooperative research services. The paper also discusses issues that may hinder the development and future success of cooperative initiatives. The paper examines the need for a shared understanding of collective and institutional collection priorities and philosophies between institutional partners. Of crucial importance in this regard is developing a shared understanding of the appropriate balance between usage-driven acquisitions policies and the collection of infrequently used research-level materials.

A Success Story of an Academic Library Consortium: ANKOS

Ertugrul Cimen

MEF University, Turkey

cimene@mef.edu.tr

Tuba Akbayturk Canak

Koc University, Turkey

takbayturk@ku.edu.tr

Sami Cukadar

Istanbul Bilgi University, Turkey

sami.cukadar@bilgi.edu.tr

ANKOS has been very successful in linking academic institutions in Turkey to an effective and efficient organisation of consortial activities. This is illustrated by figures provided on its expansion over eighteen years. The paper takes a historical and descriptive approach to the Anatolian University Libraries Consortium (ANKOS). It aims to describe the goals, fields of activity, organizational structure, functioning and the benefits it provides to Turkish academic libraries. The authors believe that this paper is useful for all academic librarians concerned with consortium systems, cost sharing, e-resource management, open access (OA), collaboration on national and international scales, and staff exchange, especially in the developing world.

Lifelong Learning: A Landmark for Personal Development and New Opportunities for Modernization of a University Library

Gulshat Daribayeva

Scientific Library of L. N. Gumilyov Eurasian National University, Kazakhstan
fordaribaeva@gmail.com

Perizat Utebaliyeva

Scientific Library of L. N. Gumilyov Eurasian National University, Kazakhstan
utebaliyeva.perizat@gmail.com

The article is devoted to the role of the university library in supporting and developing lifelong education for different segments of society. The practical experience of the information-resource center American Corner and Maker Space Astana, located in the Eurasian National University Library, shows the importance of supporting personal growth and skill development of users. Considering the functioning “American Corner and Maker Space Astana” as one of the modern phenomena of social development, the authors of the article suggest looking at its experience in organizing all of its activities. This article will analyze activities, the survey results of users, the results of observations, as well as the success stories that have influenced the personal growth and success of its visitors (teachers, students and other categories of users).

An eccentricity of the research lies in the proposed experience and consideration of topic itself. The lifelong education concept is not yet so widely accepted in the post-Soviet region. Our society has just started to realize the importance of a lifelong education for personal growth and the sustainable development of a society as a whole. American Corner creates conditions for a productive and prosperous lifestyle by offering equal access to information and educational resources. The described experience will be beneficial for the modernization of this university library as well as for other university libraries in the country.

Academic Library Sessions: Experiences and Challenges of Nazarbayev University Library

Darya Zvonareva

Nazarbayev University Library, Kazakhstan
darya.zvonareva@nu.edu.kz

Joseph Marmol Yap

Nazarbayev University Library, Kazakhstan
joseph.yap@nu.edu.kz

Purpose of the Study

The Reference Department of the Nazarbayev University Library is responsible for the development and delivery of library sessions and workshops. These are offered as part of the educational process and partnership in supporting curricular and research needs as well as to enhance the lifelong learning experience of our library users. The following categories of sessions are provided: library orientation, instruction sessions, information sessions and publishers/partners sessions. These sessions will ultimately become part of the structured information literacy program of the library. The paper seeks to describe, evaluate and assess the library sessions and workshops conducted in 2017. The paper also defines the challenges faced by librarians in conducting the sessions. Another objective is to identify improvements for raising effectiveness in organizing and delivering the library sessions.

Methodology

Data from the 2017 online registration and evaluation will be used for this study. A customized registration form was built using Springshare's LibCal tool to identify the affiliation and background information of the participants. It provides a report on the number of registered participants versus the actual number of those who attend the sessions. A follow-up evaluation form is sent to the registered participants one hour after attending a library session. This form is sent using Springshare's LibCal feature and was created using Qualtrics, an online survey platform. It uses a 5-item scale to measure the delivery and execution of each session from: excellent, very satisfactory, satisfactory, needs improvement, and poor. A 10-item survey questionnaire evaluating several aspects of the session is then answered by the participant.

Findings

An effective way to invite participants to register for a library session is through a community email announcement. The most attractive topics were those related to literature search, use and creation of multimedia objects, and how to find data. Only 27% of the total number of registered participants showed-up during the sessions. Among all the criteria, the venue and technologies were rated as other than excellent due to the venue being an open space. Most participants agreed that librarian-instructors and presentation materials were of high quality. The majority of attendees intended to practically apply the knowledge received during the sessions.

Challenges of International Librarians: Knowledge Sharing from Filipino Librarians Working Across Asia

Karen Vanessa Cruz

Bina Nusantara University, Indonesia
salamatkaren@gmail.com

Ricardo III Cruz

Teda International School, China
rickicrews@gmail.com

Joseph Marmol Yap

Nazarbayev University Library, Kazakshtan
joseph.yap@nu.edu.kz

Purpose of the Study

The Association of College and Research Libraries (ACRL) Student Learning and Information Literacy Committee (SLILC) recently published a white paper on Global Perspectives on Information Literacy: Fostering a Dialogue for International Understanding with a chapter focused on Asia and Oceania. In that chapter Dorner (2017) has argued that some teaching tools developed by Western countries may not be appropriate for Asian countries. In particular he noted that Sri Lankan and Vietnamese academic librarians have a lower status compared to academic staff and that this kind of perception may lead to an unsuccessful working relationship that would in turn hinder student learning since Information Literacy (IL) involves working closely with faculty, teachers or tutors. Librarians have always struggled to be recognized as part of the team to hone student academic performance. This paper will provide information literacy strategies and partnerships involving Filipino librarians working across Asia. As Filipino educators with their own cultural backgrounds and limitations, how can they best fit in their international working environment? How do they initiate collaboration with the faculty members and teachers? What were the cultural challenges and factors before and during the implementation of an IL program and how were they able to cope with it? What IL standards or models are they following to make their IL programs effective? How supportive is the administration in their programs? These are just some of the questions that the paper will try to answer in the three Asian countries described below.

Methodology

This paper will provide case studies from three different Asian institutions representing South East Asia, East Asia, and Central Asia where Filipino librarians are employed. They will narrate their own experiences and challenges in creating information literacy programs involving faculty collaborations and their best practices of teaching IL with foreign students. International Filipino librarians will share their stories on how they were able to champion their own IL programs overseas.

Findings

In general, Filipinos are believed to be courageous, adaptive and resilient in any kind of difficult situation. Filipino librarians also have these traits. Added to that is they can easily cultivate a sense of cultural awareness from any kind of environment. Filipinos can do any job with the help of proper training imbued with professional competencies. As an overseas employee, Filipinos are known to be visionary, flexible, patient and in possession of good interpersonal skills (Roberto, 2015). These traits are necessary for a Filipino librarian to work with locals and expatriates to fulfill their responsibility of sharing practical knowledge in the field of LIS.

Practical Applications

This paper will serve as a guide on how to start an IL program in a mixed cultural environment where collaboration is an essential factor to build a good program.

Statement of Originality

This is an attempt to collect, narrate and share the experiences of Filipino librarians working abroad and how they were able to convince and gain the trust of their fellow colleagues by instituting information literacy programs.

Adapting Statistics and Query-Tracking Tools for Reference Services: Nazarbayev University Library Case Study

Paschalia Terzi

Nazarbayev University Library, Kazakhstan
paschalia.terzi@nu.edu.kz

Yelizaveta Kamilova

Nazarbayev University Library, Kazakhstan
yelizaveta.kamilova@nu.edu.kz

The purpose of this paper is to show how Nazarbayev University Library (NUL), a small-sized academic library located in Central Asia and operating in a non-western, post-Soviet environment uses software tools, specifically Gimlet, Reference Analytics and Query Spy, to gather statistics on reference interactions, both virtual and face-to-face, to drive decision making.

The specific objectives are as follows: to describe how the above mentioned tools adapted to the local environment and needs of the Nazarbayev University Library; and, discuss if and how decision making in NUL can be improved using these tools as well as providing suggestions and recommendations for libraries in Central Asia thinking of adapting these tools to their needs. The authors believe that the topic of this article, specifically adapting technologies in libraries, is closely related to the themes of the conference, especially to trends and tools in academic library services.

The research design of the paper is a case study and qualitative research methods were adopted for the gathering of evidence and analysis of results. The authors narrate the history of gathering statistics for reference transactions in NU. Also, comparison is used to understand the advantages and disadvantages of automated tools with visualization features to the more traditional ways librarians in Central Asia have used to analyze and understand reference interactions.

Important findings of the research include: the use of software automates considerably the gathering of reference statistics, makes calculations easier and quicker, and improves the clarity of the picture librarians and management have about reference interactions.

The obvious limitation of this case study is that it is confined to the experience of only one library which has a very different vision and model of administration from other university libraries in Kazakhstan and Central Asia. As an implication, librarians from other settings should first consider carefully their context before adopting the NUL approach.

Tools for monitoring reference interactions are becoming easier to use and more sophisticated. Awareness of the available alternatives will help Kazakhstan and other libraries in Central Asia minimize the cost of implementation and choose

the best solutions for their contexts. The authors believe this work is a stepping stone in that direction.

The researchers consider this paper to be highly original as research on gathering statistics for reference transactions in Kazakhstan and Central Asia is limited. Also, using technology to gauge online user's needs has not been touched upon, especially in the context of Central Asian English language universities.

Preservation and Strengthening of the Health of the Librarian in Modern Conditions

Dominina Mook

L. N. Gumilyov Eurasian National University, Kazakhstan
dominina-60@mail.ru

A combination of features of library labor: the need to quickly and clearly think, analyze and make decisions; communicate with different people, manage an excess of textual information; as well as the instability of the pace and rhythm of work, and the high degree of physical activity poses a number of threats to work and health. The use of modern equipment leads not only to a change in the functional duties of workers, but also to the emergence of sources of danger. And as a result of constant communication with users demonstrating the whole spectrum of psych-emotional states – the threat of stress. New forms of activity affect the psychology and consciousness of people ultimately, changing them. The main goal of labor protection of a librarian is to save the life and health of the librarian in the process of his professional activity.

The purpose of this article is to describe the factors impacting on the working environment and health of librarians as well as normative documents that aim to protect librarians. The article presents the results of the study on the basis of an analysis of the negative factors of the working environment, the author's own experience, and the study of literature on the factors that cause occupational diseases and discomfort among library workers. Methods of preventing stress and occupational diseases among librarians are also suggested.

Development / Methodology / Approach

The state of health of the library staff was analyzed based on a survey questionnaire.

The received data

Based on the experience of libraries in the field of occupational safety, it can be argued that, no matter how well work activities are organized to ensure the safety of production and work, the real level of safety can be assessed only taking into account the opinions of people directly working in production. These are the people in daily contact with hazards, and who notice gaps and "weak spots" in maintaining, a safe work environment.

Limitations / consequences of research

Studies have shown that it is necessary to develop recommendations aimed at preventing occupational diseases of the librarian, strengthening librarians' ability to resist such diseases, creating a healthy lifestyle, as well as optimizing work processes in the library in order to avoid overstretching and emotional stress of employees.

Originality / value

There has been little scientific study of the professional health of a modern librarian.

Bibliographic Description of Documents in the Historical Context

Karima Tukubayeva

Scientific Library of L. N. Gumilyov Eurasian National University, Kazakhstan
karima.tukubaeva@mail.ru

Bibliographic description as a result of the centuries-old knowledge of the document at various stages of development is the basis of bibliographic information and one of the points of access to information resources. The aim of this paper is to reveal the peculiarities of the development of the bibliographic description of documents at various historical stages and to determine ways of improving bibliographic description on the basis of world trends. The study used comparative analysis of the experience of some countries in the development of standardization in the field of cataloging. The history of the bibliographic description has evolved in accordance with the trend of the times, adapting to new technologies and social demands of the scientific community. The whole historical development of the bibliographic description led to the need for its standardization. The most important problem was the development of unified international standards for bibliographic description and the alignment of national standards with international standards. Using a single method of bibliographic description unifies approaches in the field of cataloging information resources. The theoretical significance of the research lies in the fact that it reveals the essence of bibliographic description and the principles of its compilation. The historical and methodological aspects of the bibliographic description of the document are investigated beginning with its inception in antiquity and ending – in contemporary times. Practical significance and implementation of the research results consist in determining trends and prospects for the modern development of bibliographic description.

Central Asia Information and Educational Network "CALINET": Prospects of Creation and Development

Marat Rakhmatullaev

marat56@mail.ru

The report is devoted to important issues of strengthening the creative, scientific and cultural ties between the Central Asian republics on the basis of information and library interaction. The tasks and efficiency of the CALINET project (Central Asia Library Information Network) are considered. The purpose of the project is the development of the Central Asian republics (Kazakhstan, Kyrgyzstan, Uzbekistan and Tajikistan) information infrastructure by increase of the educational level of librarians and knowledge of the population of region. The project should allow to develop information communications between republics of Central Asia (CA) and other countries, and also to expand their information openness for active participation in the global information exchange. Expansion of information and library services, improvement of quality of service in libraries CA due to improvement of professional skill of librarians and creation of the new valuable information sources having global value – electronic databases, digital collections of rare and unique editions of libraries CA will be too.

Libraries and Women Empowerment: Advancing Women and their Stories for Planet 50–50 by 2030

Yelizaveta Kamilova

Nazarbayev University Library, Kazakhstan
yelizaveta.kamilova@nu.edu.kz

As libraries advance the UN2030 agenda, its participation on issues that relates to the 17 sustainable development goals (SDGs) become an essential part of library programs. Last year, United Nations commemorated with a series of activities along the theme, “Women in the Changing World of Work: Planet 50–50 by 2030” highlighting how women accelerate the 2030 Agenda, building momentum for the effective implementation of the new Sustainable Development Goals, highlighting SDG 5 – to achieve gender equality and empower all women and girls; and SDG 4: Ensure inclusive and quality education for all and promote lifelong learning.

More often academic libraries are only associated with research and social issues are left for public libraries. However, it takes a concerted effort of all libraries to advance the 17 SDGs and transform the knowledge society.

Purpose of the study

This paper will utilize quantitative approach in a form of narrative analysis sharing a program conducted by the presenters about women. It aims to increase awareness on the role and achievement of women; discuss ways to champion causes for achieving gender equality and promoting women’s rights; and promote inclusive and quality education for all sharing ideas on how to forge women’s advancement.

Methodology

Narrative analysis is an important part of knowledge transfer and communication. It is tied closely to memory that is perceived first-hand. These stories are subsequently analyzed in such a way that researchers can draw theoretical and philosophical conclusions. As it deviates from quantifiable measures, this paper will use photos, video clips and stories of librarians who are the program facilitators.

Practical Applications

This paper hopes to provide insights on programming related to SDG 4 and 5 that can be replicable for other libraries. It also hopes to stimulate discussions and actions related to women empowerment and inclusivity programming.

Statement of Originality

Academic libraries in Kazakhstan focus on research and instruction. This paper that addresses programming and social justice principles are not fully explored. The presentation hopes to encourage more academic libraries to participate and advocate for socially conscious roles.

Development of Human Resources for Information and Library Institutions

Barno Ganieva

Tashkent University of Information Technologies, Uzbekistan
barno_1972@mail.ru

The development of modern scientific and educational society is based on the following basic principles: providing access to actual information resources; creation of conditions for satisfying the intellectual, spiritual, moral, cultural and educational needs of users; to promote the revival and further development of the national culture, the preservation of the cultural and historical heritage; and to ensure the use of information and library resources on the basis of advanced information and communication technologies. Obviously, the fulfillment of these tasks is impossible without the training of highly qualified personnel, without a system of retraining of library workers, and without the development of a network of training and consulting centers. The department "Information and Library Systems" of Tashkent University of Information Technologies from the first days of its appearance has taken the course on the development of the new curriculum that meets modern requirements. Joint projects with the universities of Italy, England, Scotland and Latvia have allowed the development of new curricula and the opening of a master's program in the training of specialists in demand.

A Review of Available Mobile Technologies for Libraries

Gulzhan Baidyussenova

Nazarbayev University Library, Kazakhstan

gulzhan.baidyussenova@nu.edu.kz

Libraries have the opportunity to extend new different types of library services to users. Usage of portable technology has changed the method for individuals to get and import data. Patrons need simple access to application data and information putting weight on Library and Information Science (LIS) experts to thoroughly consider the patron's data needs. With help of mobile phones and electronic devices, libraries can revolutionize the way of providing instant access to information. This presentation gives a short review of the different available technological trends and how libraries can manage to introduce these new trends. The presentation gives various suggestions to help this objective.

Modern Trends in Innovative Library Development

Abdigazieva Gulmairam Khassenovna

Scientific Library of Atyrau State University, Kazakhstan

gulmairam.abdigaziyeva@gmail.com

The library of the future is an informational cultural center where you can find everything necessary to obtain information, use, storage and distribution. A user of library services must receive information in 24/7 mode, wherever mobile communication is available (internet, social networks, telephones, smartphones, laptops and other available user tools).

Technological novelties: automatic dispensers and return of books (RFID), multimedia space, and “101 point of reading” are some relevant trends for the individual work of the reader. Remote users have the option to control online registration, online order documents, and virtual bibliographic assistance.

Creation of co-working areas, target media spaces, art areas, CSL sites (Culture, Study, Library), laboratories of youth innovative creativity, a unified system of identification and authorization of the reader is already a reality of the present time.

Sites of the library, service on the IRI system (selective dissemination of information) are there to improve innovation of the activities in the libraries. New opportunities raise them to a new level of service, changing their status and significance in the life of society.

ABOUT THE AUTHORS

Gulzhan Baidyussenova is working in Nazarbayev University since 2016. As Expert-Manager of the department of registration and cataloging of library collection, Gulzhan has provided her services independently. She contributed an article focused on the use of virtual opportunities of academic scientific communities by teachers and researchers of Nazarbayev University at Library Connect last year. Gulzhan received her Bachelor of Science in Library Science at Kokshetau State University and Masters in Computer Science at Eurasian National University.

Ingrid Bon is currently the Manager of Development Programmes in IFLA. Her main programmes are Building Strong Library Associations, International Advocacy programme, International Leaders Programme, support of Library Development Advisory Committee and support of Literacy and Reading Workgroup. She already served numerous posts in IFLA and in 2016, she became the core trainer for IFLA International Advocacy Programmes. Prior to serving IFLA, she became a public library director in Gendt. She received in 2014 the Royal Decoration: Member of the Order of Oranje Nassau for serving long term as city council member.

Tuba Akbaytürk Çanak has been serving as Koç University Library Director since 2011. Within the scope of her position, Tuba manages 5 libraries in 3 different cities in Turkey. Budget management, collection development, e-resources management, library automation, resource sharing, digitization and user services are some of the areas she is responsible for. Tuba had Assistant Director and Systems Librarian positions at Koç University since she joined in 1998. She was involved with library reorganization, library space repurposing and digitization projects intensively. Tuba who was the Anatolian University Libraries Consortium (ANKOS) Steering Committee Member responsible for negotiations for the last 6 years, now serves as ANKOS President for the term of 2016–2018. She is managing a project called “Beyoğlu Research Centers Platform and Library Union Catalog” with Istanbul Development Agency under the framework of “Innovative Istanbul.” Tuba earned her BS from Boğaziçi University in Molecular Biology and Genetics and her MLS from Indiana University.

Ertuğrul Çimen has a BS degree from Hacettepe University Faculty of Literature, Librarianship Department and MA degree from Kadir Has University Social Sciences Institute Finance & Banking Program. His current position is Library Director of MEF University. His professional interests are: academic library management, library consortia, license agreement for e-resources, library collaboration, resource sharing & document delivery, lifelong learning, and staff exchange programs for librarians. He has an active role in NGO’s and professional organizations at national and international level. He is the former president of Anatolian University Libraries Consortium (ANKOS) and former Executive Board member of Turkish Librarians

Association (TLA). He has been serving Coordinator of ANKOS Academy and ANKOS Collaboration Study Groups, he is also the Information Coordinator of IFLA document Delivery & Resource Sharing Standing Committee. He is the editorial board member of Interlending & Document Supply Journal (Emerald Publishing) and International Journal of Knowledge Management & Practices (IJKMP).

Karen Vanessa B. Cruz is the Manager of BINUS University Library and Knowledge Center in Jakarta, Indonesia since 2010 up to the present. Ms. Cruz is a native of the province of Bulacan and a graduate of Baliuag University in the Philippines where she received her Masters of Library and Information Science degree. She manages three (3) libraries in different campuses namely, BINUS University Anggrek, Kijang and Alamsutera Campus.

Ricardo Cruz III is currently the K-12 Librarian at TEDA International School, Tianjin China. This is his first year working as an Overseas Filipino Worker (OFW). Before becoming an expatriate educator, he had been the school librarian at Chinese International School Manila for five (5) years. He received his Bachelor of Library and Information Science with honors from the University of Santo Tomas, Manila; and is continuing to pursue additional qualifications in school librarianship. His educational pursuits are information literacy, digital citizenship, and love of reading.

Sami Çukadar completed his undergraduate and graduate studies in Information and Document Management at Istanbul University and his BA in Economics at Anadolu University. Sami Cukadar is the Library Director at Istanbul Bilgi University Library and e-Resources in Istanbul, Turkey. He is also an academic staff at Istanbul Bilgi University Faculty of Law and teaches "Research Methods and Accessing Legal Information Resources" to the first year Law School students. Mr. Çukadar is also active in non-governmental organizations in the field of librarianship and information management. He is the board member of the Anatolian University Libraries Consortium and coordinator of UNAK-Turkish Platform of Law Librarians. He has written and made studies on fields of total quality management, distance learning and university libraries. His current research focuses on legal information, information literacy, distance education, university libraries, consortia and ERM.

Gulshat Daribayeva is the head of the scientific and methodological department of the L.N. Gumilyov ENU Scientific Library. She has undergone specialized higher education and published articles in professional publications. Her work experience in the library is more than 30 years. The field of professional interests include developing the reading habits and the love for books, improving skills of the library staff, the usage of new technologies in the work of libraries, research in reading, using the Internet, and many more.

Barno Ganieva is the Head of Information and Library Systems Department at Tashkent University of Information Technologies, Uzbekistan.

Gulzhan Irzhanova is the Director of scientific library of Taraz State University named after M. Kh. Dulaty, Kazakhstan. She is the current President of the Association of Libraries of Higher Educational Institutions of the Republic of Kazakhstan. She has 27 years of work experience and her professional interests are: research in the field of bibliography; automation of library and bibliographic processes; management of remote network resources; organization of reference and search facilities; configuration of resources access services and analysis of their use in libraries; international library cooperation; and library quality management system. Gulzhan Irzhanova is the author of more than 80 publications on library and bibliographic information.

Yelizaveta Kamilova holds a degree of Master of Library Information Science. She is an Expert Manager of the Reference Department at Nazarbayev University Library. Yelizaveta is a Subject Librarian for Graduate Schools of Business, Public Policy and Kazakh Language and Turkic Studies Department. Her recent publications include "Synchronous and Asynchronous Engagement in Virtual Library Services as Learning Support Systems from the Perspectives of Post-Graduate Students: A Case Study" published by the Journal of Information Science: Theory and Practice and "Building a Culture of Integrity through Library Initiatives, Academic Collaboration and Administrative Support" published in the proceedings of the 2nd Annual Conference on Academic Integrity and University Governance. She has developed several curriculum guides to help students with using library databases and services.

Abdigaziyeva Gulmairam Khassenovna works as a Bibliographer of the Department of Scientific Information and Rare Books in Scientific Library of Atyrau State University named after Kh. Dosmukhamedov. She graduated Cultural and Educational School in 1985, Aktobe and Higher-Pedagogical Institute of Culture in 1993, Shymkent. At the moment her work experience is 26 years. In 2000, she received Appreciation Letter and Merit Certificate from the Atyrau Regional Department of Culture. In 2015, she received "For Services in Propaganda of Knowledge of Culture and Promotion of Politics" from the Regional Trade Union Association of Cultural Workers. In 2016 received a Letter of Gratitude from the rector of the Atyrau State University named after H. Dosmukhambetov. In 2015–2017, bibliographic indexes of literature were published (Series: University scientists, she was originator). She also has several articles published in scientific journals "Vestnik Universiteta", in the materials of international, republican scientific-practical conferences.

Dominina Mook is the chief specialist of the Department of Cataloging and Systematization of Documents of the Scientific Library of the Eurasian National University named after L. N. Gumilyov. Her work experience in the scientific library of the ENU is about 25 years. Her total work experience is more than 40 years. She has a great practical experience in analytical and synthetic processing of documents, organization and maintenance of electronic and traditional catalogs.

Her circle of interests include: modern information technologies, and tendencies of development in the field of library business. She has published numerous professional papers in LIS.

Marat Rakhmatullaev is a professor at Tashkent University of Information Technologies Department of Information and Library Systems. He earned his PhD at Tashkent Polytechnic Institute. He specializes in the fields of information technologies, fuzzy logic, creation of expert systems, automated management systems and CAD/CAM, data and knowledge bases, and automated library systems. He developed library projects and became a consultant to local library associations. His work included the preparation library conferences, seminars, and workshops. From 2004–2012 he became the Head of Foreign Literature and International Relations Department of the Uzbekistan National Library.

George Andrew Spencer is a Senior Academic Librarian and Bibliographer for Slavic, East European, Central Asian and Middle Eastern Studies at the University of Wisconsin – Madison in Madison, Wisconsin, U.S.A. Prior to coming to the University of Wisconsin in 2002, he was a Visiting Assistant Librarian in the Digital Library Program at Indiana University – Bloomington (U.S.A) from 1999 until 2002. He was an Acquisitions and Cataloging Specialist in the Monographic Processing Unit of the Main Library at Indiana University – Bloomington from 1993 until 1999. He holds a Bachelor of Science degree in Physics and a Bachelor of Arts degree in Russian Studies both from the University of Arizona, a Master of Arts degree in Russian and East European Studies from the University of Kansas, and a Master of Library Science from Indiana University – Bloomington. From 2011 until 2013, he was Chair of the Eurasia and Central Asia Sub-committee of the American Library Association's International Relations Committee. He was Chair of the Slavic and East European Section of the Association of College and Research Libraries from 2007 to 2008 and Co-Chair of the Digital Projects Sub-committee of the Committee on Libraries and Information Resources of the Association for Slavic, East European, and Eurasian Studies from 2003–2008.

Paschalia Terzi is currently the Senior Expert of the Reference Department of Nazarbayev University Library in Astana, Kazakhstan. She finished her Master of Digital Libraries and Information Services from the University of Borås, Sweden in 2015. As a graduate student she received the Erasmus scholarship for an internship at The British Library, UK.

Karima Tukubayeva is the head of department of cataloging and systematization of the documents of the Scientific Library of L.N. Gumilyov Eurasian National University. The sphere of activity is connected with a library profession of more than 25 years. She has a significant experience in the field of cataloging. Her scientific and practical interests include: cataloging of information resources, classification practice, and electronic catalogue as an information system. She has published papers in the annual international scientific and practical conference "Modern Trends in the Development of University Libraries: Experience, Problems and Perspectives".

Teshabayeva Umida is the Deputy Director on reference services at National Library of Uzbekistan. After completing her Library Science program in Tashkent State University, she has worked as a director, librarian and head of methodical, reference, and patron services departments in different years. Umida is married and has three children.

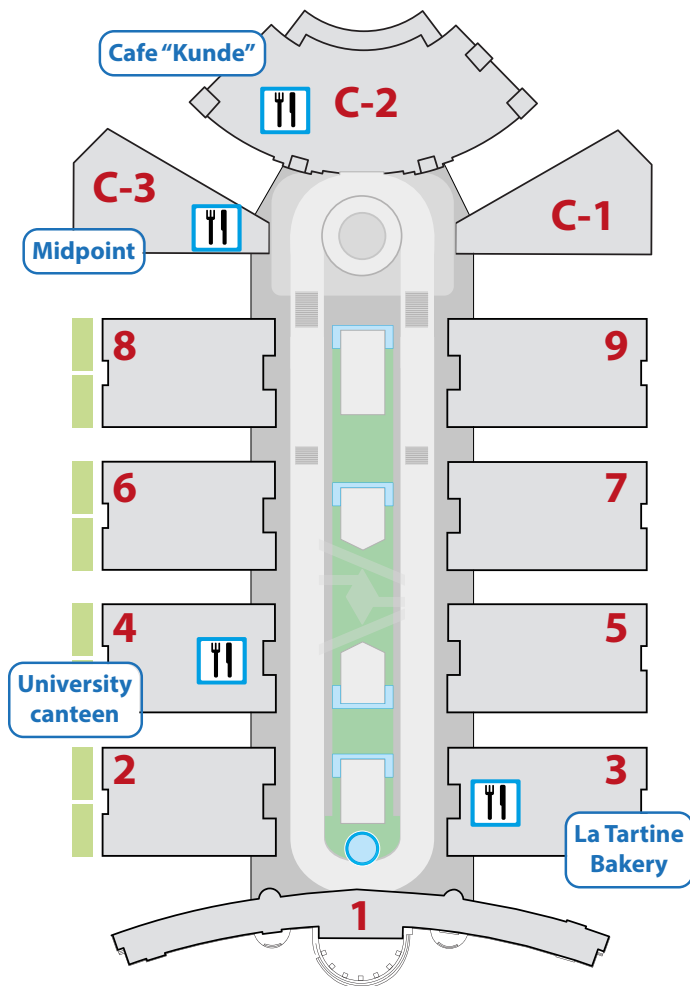

Perizat Utebaliyeva works as a coordinator of the American Corner and Maker Space Astana which is the information resource center of the U.S. Embassy and maintains the whole management of the center. She earned her Master of Social Science with specialization in western studies.

Joseph Marmol Yap is currently the Expert-Manager of the Reference Department of Nazarbayev University Library in Astana, Kazakhstan where he is the Subject Librarian for the Center for Preparatory Studies and Graduate School of Education. He finished his Master of Library and Information Science from the University of the Philippines-Diliman – School of Library and Information Studies in 2010. As part of his graduate student experience, he joined the 1st International Collegiate Information Literacy Contest in the School of Information Management, Wuhan University, Wuhan, China in July 2010 and won third place. He also participated in UNESCO's Global Media and Information Literacy Week conference in Sao Paulo, Brazil in 2016 and introduced MIL in his former institution. As an active professional, Joseph became the President of the Association of Special Libraries of the Philippines in 2013 and also served numerous positions in the Medical and Health Librarians Association of the Philippines. He also served the Philippine Librarians Association, Inc. in various capacities. He is an active member and holds a number of committee memberships in Special Libraries Association – Asian Chapter.

Darya Zvonareva is a Reference librarian and Subject Librarian for School of Engineering and School of Mining and Geosciences at Nazarbayev University. She has an expanded experience in reference services. She has written and lectured on information literacy, academic integrity, and librarianship.

IEEE eLearning Library

Опция подписки на платформу IEEE *Xplore*® Digital Library

Ведущая онлайн-коллекция кратких образовательных курсов

Библиотека IEEE eLearning предлагает контент о передовых технологиях, который может предоставить только IEEE. Удобная система обучения предлагает сотни учебных часов по ключевым и новейшим технологиям, предоставляя специалистам, преподавателям и студентам академических учреждений, корпорациям и государственным учреждениям лучший способ обучения.

Библиотека IEEE eLearning отбирает лучшие образовательные курсы из материалов конференций и семинаров IEEE по всему миру и предоставляет доступ к ним в увлекательных, образовательных и интерактивных онлайн-курсах.

Исследователи могут использовать библиотеку IEEE eLearning, чтобы оставаться в курсе последних разработок в соответствующих отраслях технологии, создавая большую синергию с другими продуктами и научно-исследовательскими командами и позволяя вашей команде воспользоваться большими рыночными возможностями.

IEEE eLearning Library предоставляет много полезных возможностей:

- Повышение общего уровня знаний за пределами конкретной дисциплины и осведомленности о конвергентных технологиях
 - Возможность углубленного изучения новых технологий
 - Помощь в развитии навыков, необходимых для профессионального роста и сохранения конкурентоспособности на современном рынке
 - Курсы разрабатываются, рецензируются и обновляются экспертами в этой области
 - Сотни учебных часов по ключевым и новейшим технологиям
 - Доступ через платформу IEEE Xplore, с адаптированным под мобильные устройства дизайном и мощными инструментами для поиска
 - Печатные индивидуальные сертификаты CEU или PDH после успешного завершения курса
 - Курсы, разработанные ведущими мировыми экспертами в своих областях
- Новые программы обучения доступны по следующим направлениям:
- Кибер-безопасность
 - Искусственный интеллект и этические принципы разработки
 - Интернет вещей (IoT)
 - National Electrical Safety Code[®] (NESC[®]),
"Национальные правила электробезопасности"

Оформите подписку сегодня! Узнайте больше о библиотеке IEEE eLearning. Посетите веб-сайт:

Passport

Глобальная система информации по рыночным исследованиям, предоставляющая статистику и аналитические отчеты по отраслям промышленности, странам, потребителям и компаниям.

Онлайн платформа Passport содержит 115 миллионов статистических данных, позволяющих проводить международные сравнительные исследования, а также 25 000 отраслевых аналитических отчетов и статей, предоставляя понимание глобального бизнеса и экономической ситуации в 210 странах мира.

ИДЕАЛЬНЫЙ ИСТОЧНИК ДЛЯ ИССЛЕДОВАНИЯ МЕЖДУНАРОДНЫХ И ЛОКАЛЬНЫХ РЫНКОВ

- Анализ развития и тенденций рынков потребления и производства
- Текущие размеры рынков, индустрий, категорий, а также объемы продаж и прогнозы роста
- Стратегии компаний, их позиционирование, сильные-слабые стороны и направления их дальнейшего развития
- Понимание потенциала для роста бизнеса в частности и экономического потенциала страны в целом
- Множество макроиндикаторов как для развитых экономик, так и для развивающихся стран мира

Passport поддерживает преподавание и научные исследования по целому ряду дисциплин:

- Международный бизнес; Маркетинг; Менеджмент; Предпринимательство
- Экономика; Социальные Исследования; Международные Отношения; География
- Гостиничный Бизнес и Туризм; Исследования Моды; Продовольственный Маркетинг; Исследования в области здравоохранения
